

STEPHANIE RYALL

MS, LPC, BCN, QEEG-D

PROFILE

I am a natural leader and have success teaching clients and professionals in a manner that fosters insight, true change, and radical healing. My experience in startup business ownership/management and the full spectrum of mental health counseling work makes me a wonderful candidate in both clinical and organizational settings.

I am known for my ability to build rapport with clients, generate outside-of-the-box approaches to helping, and explain complex concepts in an easily understandable way.

I am always looking for more ways to grow and learn and believe it is incredibly important to have research to support any technique that I use.
